

GONDOLA™

Move better, Live better

GONDOLA™ TREATMENT: RECOVER MOTOR CAPABILITIES, IMPROVE QUALITY OF LIFE

The peripheral neurostimulation therapy (AMPS, Automated Mechanical Peripheral Stimulation)

delivered via GONDOLA™ device is effective in improving motor symptoms and balance impairments induced by neurological diseases like Parkinson's Disease and parkinsonisms, by cerebral stroke or – in some cases – by sensory / sensory-motor peripheral neuropathies.

Cerebral stroke, Parkinson's disease, and peripheral neuropathies are the main causes of motor disabilities, **causing a progressive impairment in walking and balance, reducing consequently patient's independence.**

Also, they cause difficulties in work activities, and generate relevant recurring cost for cures, treatments and care.

The GONDOLA™ treatment, in patients who respond positively, **allows to have:**

- Better balance, improved postural stability,
- Faster speed of walking (reduced bradykinesia),
- in Parkinson's, reduction of Freezing of gait and akinesia.

Move better, Live better

GONDOLA™: AN EFFECTIVE ADD-ON THERAPY

GONDOLA™ is an important add-on therapy for people who experience mobility impairments due to **Parkinson's disease, peripheral neuropathies, and for people who suffered a stroke.**

The neurostimulation delivered via **GONDOLA™ device is, for these patients, the first available treatment to improve balance and postural stability and to walk better and faster, allowing to live a better quality of life.**

It is also important to note that the GONDOLA™ treatment is non-invasive, does not require additional medications, and has no side effects.

GONDOLA™ benefits in Parkinson's have been documented via clinical trials and scientific publications.

ENJOY BETTER WALKING AND IMPROVED BALANCE

GONDOLA™ is a medical device for personal use, easy to carry around, designed to enable patients to receive AMPS treatments easily and conveniently at home.

AMPS therapy is a non-invasive neurostimulation treatment delivered in specific points of both feet that generates increased afferent stimuli to the spinal cord, inducing so an improved management of motor schemes at spinal level and at brain level (it has been documented that the GONDOLA™ treatment generates increased connectivity between brain areas involved in control of movement).

Treatment outcomes include a reduction of mobility impairments and an improved balance.

Move better, Live better

HOW TO VERIFY THE GONDOLA™ TREATMENT OUTCOMES ON YOU?

To verify your response to AMPS therapy is necessary to book a treatment session in a GONDOLA™ Specialized Center.

During the visit the specialized operator verifies the clinical situation of the patient, then a GONDOLA™ treatment is delivered.

In case of positive response, benefits are usually immediately visible after the treatment, and are perceived for a period up to 4-5 days following the treatment.

Upon positive outcome, patients can consider buying a GONDOLA™ device for personal use.

In most cases, two treatments per week allow to maintain benefits over time.

BOOK A VISIT

GONDOLA™: A PORTABLE MEDICAL DEVICE FOR PERSONAL USE

GONDOLA™ has been designed for domiciliary use.

During treatments patients shall be seated, feet in the device.

**Treatment duration requires less than 2 minutes,
benefits are perceived up to 4-5 days following use of the device.**

**Devices for personal use are customized according to the
patient's characteristics.**

Configuration and programming is performed by Specialized
Operators in GONDOLA™ Center.

GONDOLA™ operates on rechargeable batteries.

Move better, Live better

IMPROVE YOUR QUALITY OF LIFE!

Walking impairments and reduced balance induced by neurological conditions like **Parkinson's, stroke and peripheral neuropathies** cause a **progressive loss of independence**.

The better mobility, the lower risk of falls, and the increased motor independence patients experience following GONDOLA™ treatments have a very positive impact quality of life.

Gondola Medical Technologies SA invites all patients to follow all therapies prescribed by their treating doctors.

GONDOLA™ is a CE 0476 medical device.
